

## WILSON-PENDLETON.

**Two Prominent Families United by Marriage Yesterday Afternoon.**  
Yesterday afternoon at 3 o'clock Mr.

Andrew Wilson, a well known young business man, secretary of the Wheeling Steel Works at Benwood, and Miss

G Virginia Pendleton, daughter of the late Hon. Joseph Pendleton, were united in marriage at the residence of

d the bride's mother, Mrs. Margaret Pen-

dieton, on Twelfth street. The ceremony was very quiet, and only the immediate families and a few friends of the parties being present. The ceremony was conducted by Rev. Dr. R. R. Swopston, rector of St. Matthews Church, after the solemn ritual of the Protestant Episcopal church. The presents received were notably handsome and tasteful and the congratulations hearty. Mr. and Mrs. Wilson left immediately after the ceremony for an Eastern wedding trip of indefinite duration. After their return to the city they will have rooms at the McClure House. Owing to the recent death of Mrs. F. P. Jepson, Miss Pendleton's sister, the wedding was as unostentatious as it was possible to make it.

**It Is Certain that a Settlement will not be Made Until Fall.**

There will be no settlement of the firm glass strike until next fall, says the Pittsburgh *Commercial-Gazette*. The Conference Committee of the Glass Manufacturers Association met yesterday and agreed to do nothing about the matter. Yesterday was the day set to allow the fires in the different factories in Pittsburgh to go out if the workers had not signed the new settlement agreement. As the former did not comply with the request several of the factory owners gave orders to let the fires go out, and the settlement of the strike in these houses is a thing of the past this season.

son. It would take two weeks to get the pots heated before they could start, and it is not at all likely they will resume until next September. All the striking class workers are making preparations for the annual summer fishing trip. On account of being idle they will leave next month to be gone until the last of August. In the meantime should the manufacturers want to settle the strike it is not likely that the workers will come to any terms with them until fall. If they go away they will be in no hurry to come back.

**MINNIE PALMER.**

**The Interest in Her Coming Engagement**

Unabated—Crowded Houses Assured.

The interest in the engagement of Miss Minnie Palmer, who opens at the Opera House to-night in the strongest play she has ever had, "My Brother's Sister," instead of flagging seems to grow. The few speculators who in spite of the precautions taken to prevent, managed to secure a few seats to resell, made a fat thing of it, desirable seats for Friday night selling readily at \$2 50 to \$4. The seats in the gallery for to-night's performance also sold well yesterday. A number of eligible seats upstairs remain, and those who buy early

to-day will be almost as well fixed as those who get in the rush. The seats for to-morrow night, however, will be a little more difficult to get, but the chances are that to-morrow are not at all good, and the seats left are fairly good. The matinee performance will be the same play as to-night, "My Brother's Sister," and each lady in the audience to-morrow afternoon will receive a lovely souvenir. It is evident that at every performance the popular little comedienne is to be greeted by crowded houses, and the thing is plain to see who desire to see her to the best advantage. The demand for seats to-day, before they are all gone.

Miss Palmer and her company did not come to Wheeling yesterday, as it was thought they might. They will arrive

on the Pan-Handle railroad at 3:45 this afternoon. An officer has been secured here to meet at the train the detective who travels with the company in charge of Miss Palmer's diamonds, and accompany him to the hotel.

**THE LINSLEY INSTITUTE.**

**The Board of Trustees Completed—The Organization of the Board.**

There was a meeting last evening of the Board of Trustees of the Linsley Institute, and the several vacancies existing in the membership of the Board from various causes were filled by appointment by the surviving members as

the terms of the trust provided. The new members appointed are Dr. John L. Dickey, Rev. Dr. William H. Cooke, Prof. Robert Dabell, and A. J. Clarke, Esq. The Board then organized by the election of Mr. A. W. Campbell as President, and Mr. John J. Jones as Secretary, and the appointment of an Executive Committee consisting of President Campbell, Secretary Jones and Hon. Chester B. Hubbard.

The trust fund, created by the late Noah Lively, for the establishment of the school which bears his name now amounts in round numbers to \$18,000, invested in good securities. The institute promises well for the future.

**LYCEUM LECTURE**

And Literary and Musical Entertainment at Fourth Street M. E. Church this Evening.

The lecture and entertainment at Fourth Street M. E. Church was postponed for this week until this evening. The lecture to be given will be upon the subject of "Alexander, the Great's Conquests and Greek Influence in the East." Historically it is a subject of the greatest interest, both on account of its character, and because of its bearing upon the beginning of Christianity. Every effort will be made to give it an entertaining and instructive form.

The literary subject is "Lord Macaulay," one of the most delightful subjects to all lovers of noble literature. The following is the programme of literary and musical exercises:

Lecture—Rev. R. F. Randolph.  
Music—Piano Duet—Mrs. J. E. Shellhase, Miss Katherine Dunning.  
Paper—"Lord Macaulay"—Miss Spears.  
Music—"Soldier's Man, Frank Stanton."  
Reading from "Lays of Ancient Rome"—Robert Darrah.  
Music—Cornet Duet—Drs. Milligan and McClure.

**To Compete with the Tack Factories.**  
It is said on good authority that the Labelle nail works are about to put in a building on their premises now vacant,

but formerly occupied as a blacksmith shop, a plant for the manufacture of the small sizes of nails out of pickled iron, as they are now made in numerous tack factories. The inventor of the new process was heretofore explained in the columns of this paper, the nails thus made are sold at prices at which the ordinary cut nail cannot begin to compete with them. The iron used is treated before being cut to a bath in acid and then in alkali, which renders it so easy to cut that the knives of the machines do not have to be ground nearly so often as the knives of the old machines. The reduction of labor thus accomplished cheapens the nail materially. It has been a question whether the nail mills would come to

the tack makers' way of cutting nails, or abandon the market for small sizes to their competitors. The LaBelle seems to have decided to carry the war into Africa.
